Guide for Clinics

The University of Calgary Faculty of Veterinary Medicine's DVLC partners allow fourth year students to build experience with practicum rotations. These happen in off-campus veterinary practices in Alberta, like yours! These rotations, lasting 2 to 6 weeks, offer students real-world experience under the guidance of one of your team's experienced veterinarians, who becomes the Practice Rotation Coordinator (PRC).

Benefits:

- Create connections with fourth year students and future veterinarians
- Enhance your mentorship skills
- Gain access to events and workshops hosted by the UCVM
- Access to the University of Calgary Health Sciences Library
